

Increasing In Tunisian Knit Stitch

Increasing in TKS is done ONLY on the forward pass, with the return pass worked in the same manner as usual, but with one more stitch to work off the hook.

To increase, insert your hook in the space between two stitches (with the hook entering through the front and emerging at the back) and draw up a loop. This counts as one increase and the loop is kept on the hook the same as the rest of the stitches and worked back off in the same way.
